

3.2 Modes of Transportation

Different Modes of Transportation

- Air
- Water
- Rail
- Road
- Pipeline

Air Transportation

- Transportation by air can be done by using:

Air Transportation

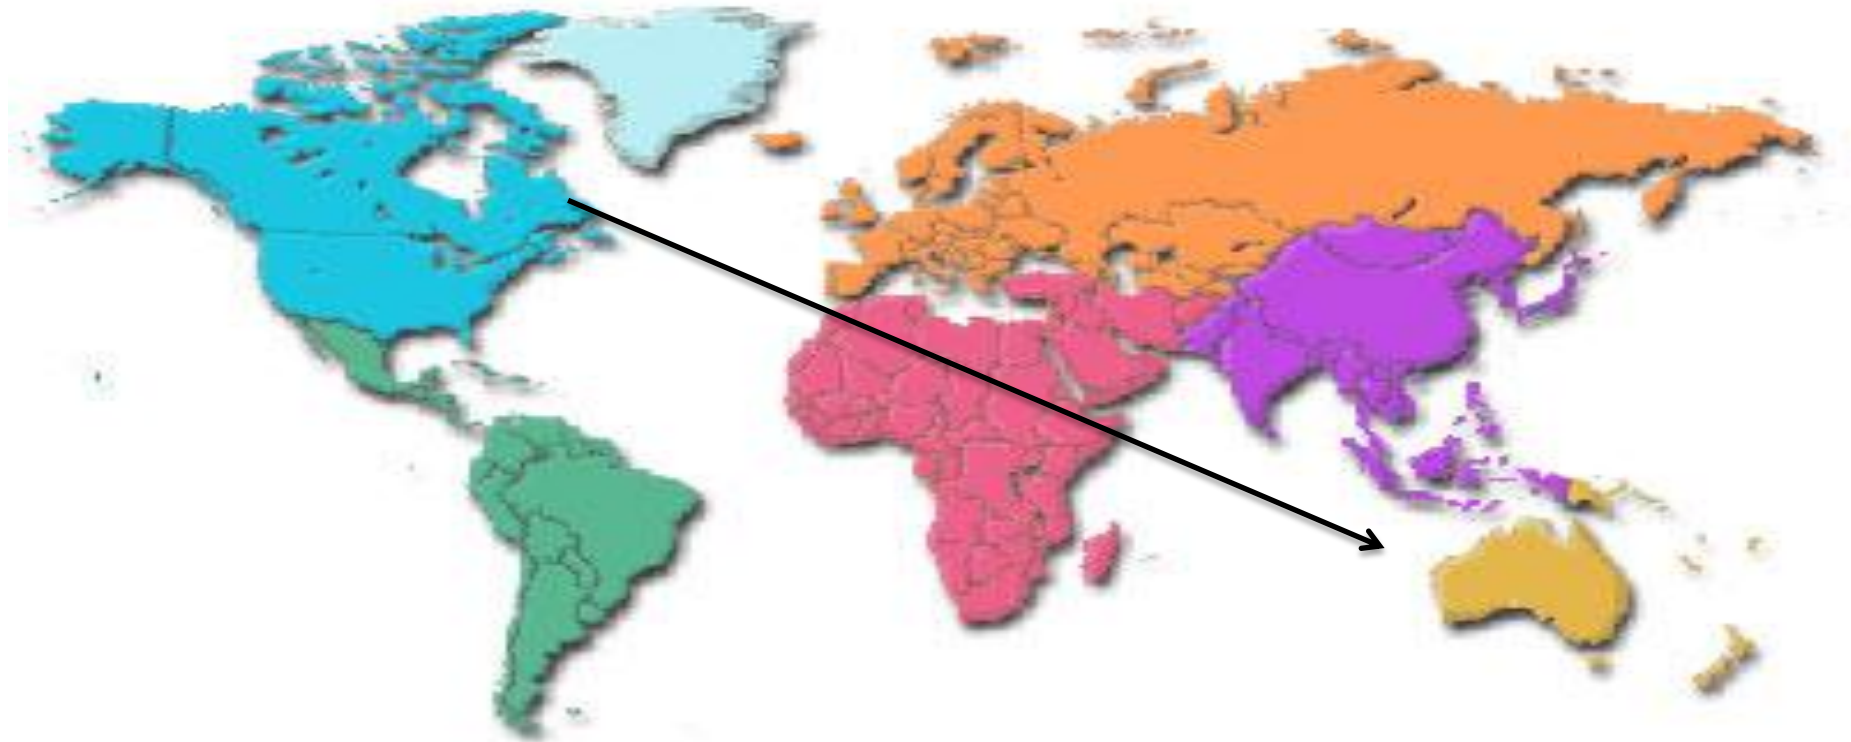

Air Transportation

Air Transportation- Advantages

Advantages of using air transportation:

- Fastest form of travel over long distances

Air Transportation- Advantages

- Best for moving perishable goods (human organs, oysters)

Air Transportation- Advantages

- Useful for moving passengers

853 people

Air Transportation- Disadvantages

Some disadvantages to air travel are:

Expensive

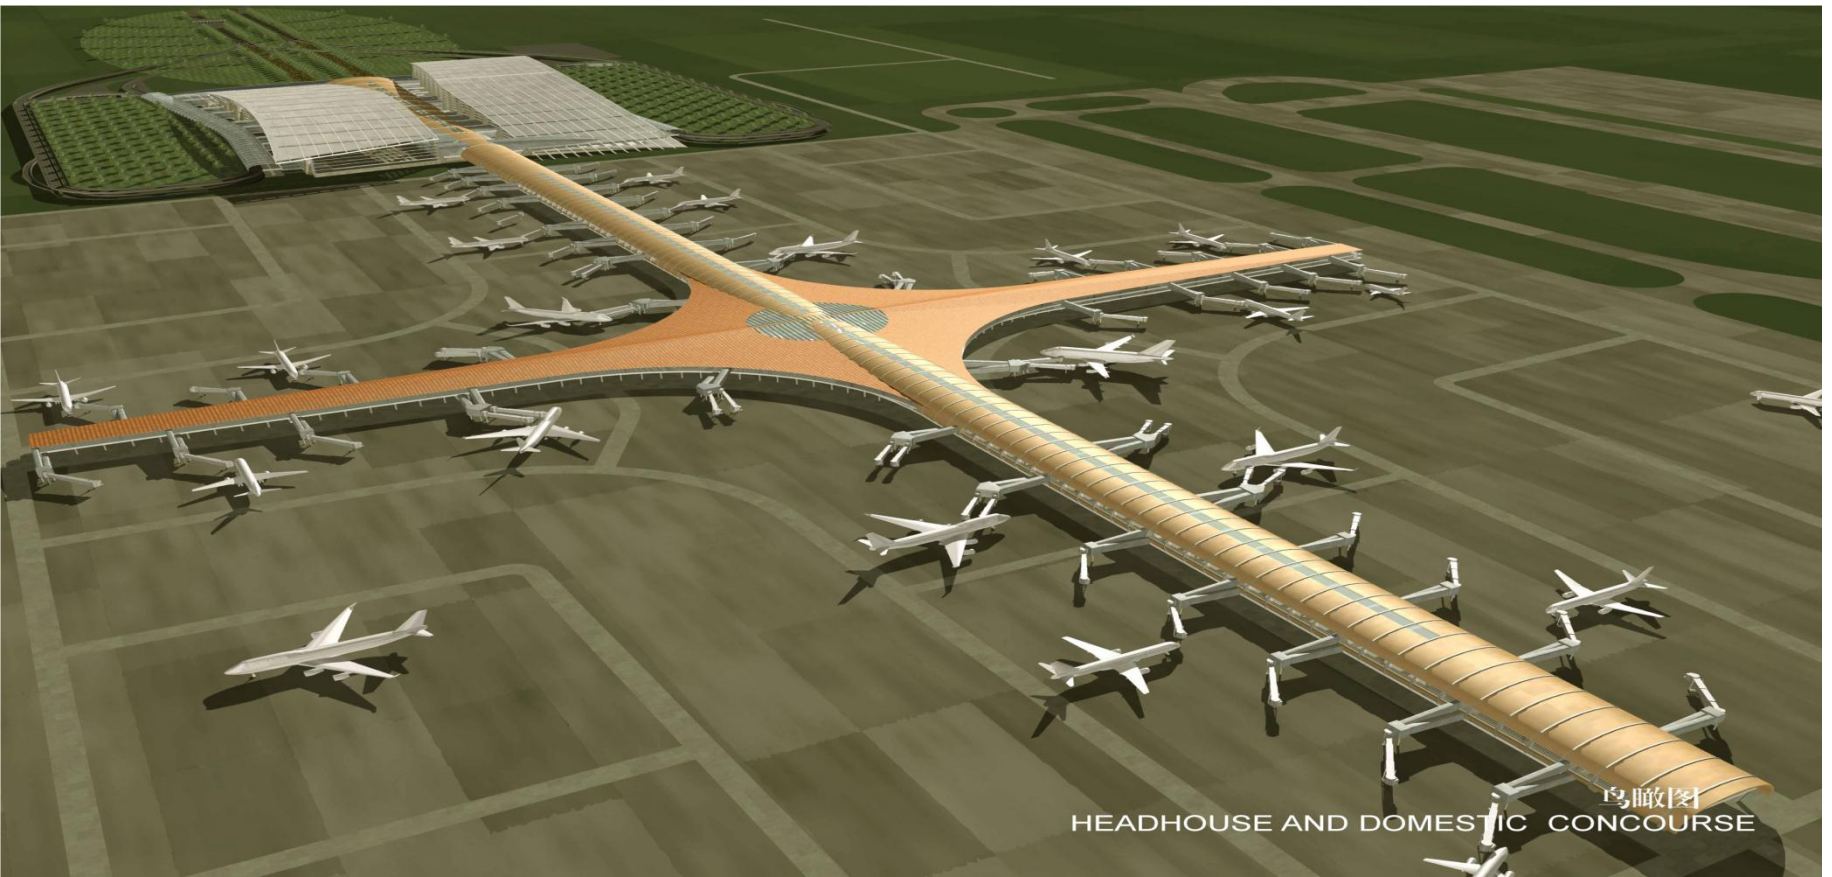

Air Transportation- Disadvantages

Can't handle heavy cargo

Air Transportation- Disadvantages

Need airports and terminals

HEADHOUSE AND DOMESTIC CONCOURSE

Water Transportation

- Water transportation can be done by:

Water Transportation

Water Transportation

Water Transportation

Water Transportation

Advantages of water transportation:

Cheapest for bulk goods (coal)

Water Transportation- Advantages

Moving Goods Overseas

Water Transportation- Disadvantages

Some disadvantages of water transportation are:

Need convenient harbors

Water Transportation- Disadvantages

Most of Canada's waterways

Closed part of the year (ice)

Rail Transportation

7722

120417

Rail Transportation- Advantages

**Cheapest way to ship bulky
Goods over land**

Rail Transportation- Advantages

Rarely affected by **Weather**

Rail Transportation- Disadvantages

Some disadvantages of rail transportation are:
There has to be tracks to every destination

Rail Transportation- Disadvantages

Too slow for perishable goods

slow²

Rail Transportation- Disadvantages

Slow for moving people

Road Transport

Road Transport- Advantages

Can reach most amount of Places by using roads

Road Transport- Advantages

Pretty fast at moving goods

Road Transport- Advantages

Useful for moving people

Road Transport- Disadvantages

Affected by weather conditions

Road Transport- Disadvantages

Expensive for moving bulky goods

Pipelines

Pipelines- Advantages

Some advantages for pipelines are:

Not affected by weather

Pipelines- Advantages

Cheapest for moving fluid goods

Pipelines- Disadvantages

Expensive to build

Pipelines- Disadvantages

Can't move people this way
